

Construction Engineering

VecTrance's mission is to provide energy and infrastructure companies with international consulting services and engineering expertise, for their operational and development projects around the world.

At engineering and construction stage, we know success lies on the expertise you bring together for the delivery and management of the work phase of your project, and that it may be challenging at times to find the right skills required.

That's why we provide you with a **multidisciplinary range of expertise in construction supervision and engineering** for your projects. Our experienced specialists join your local project teams to support you from an operational point of view and with managerial and supervisory responsibilities, in order to deliver your project on-time and within budget.

VecTrance

The success of our missions is the success of your projects.

International Energy & Infrastructure Engineering Consultancy Services

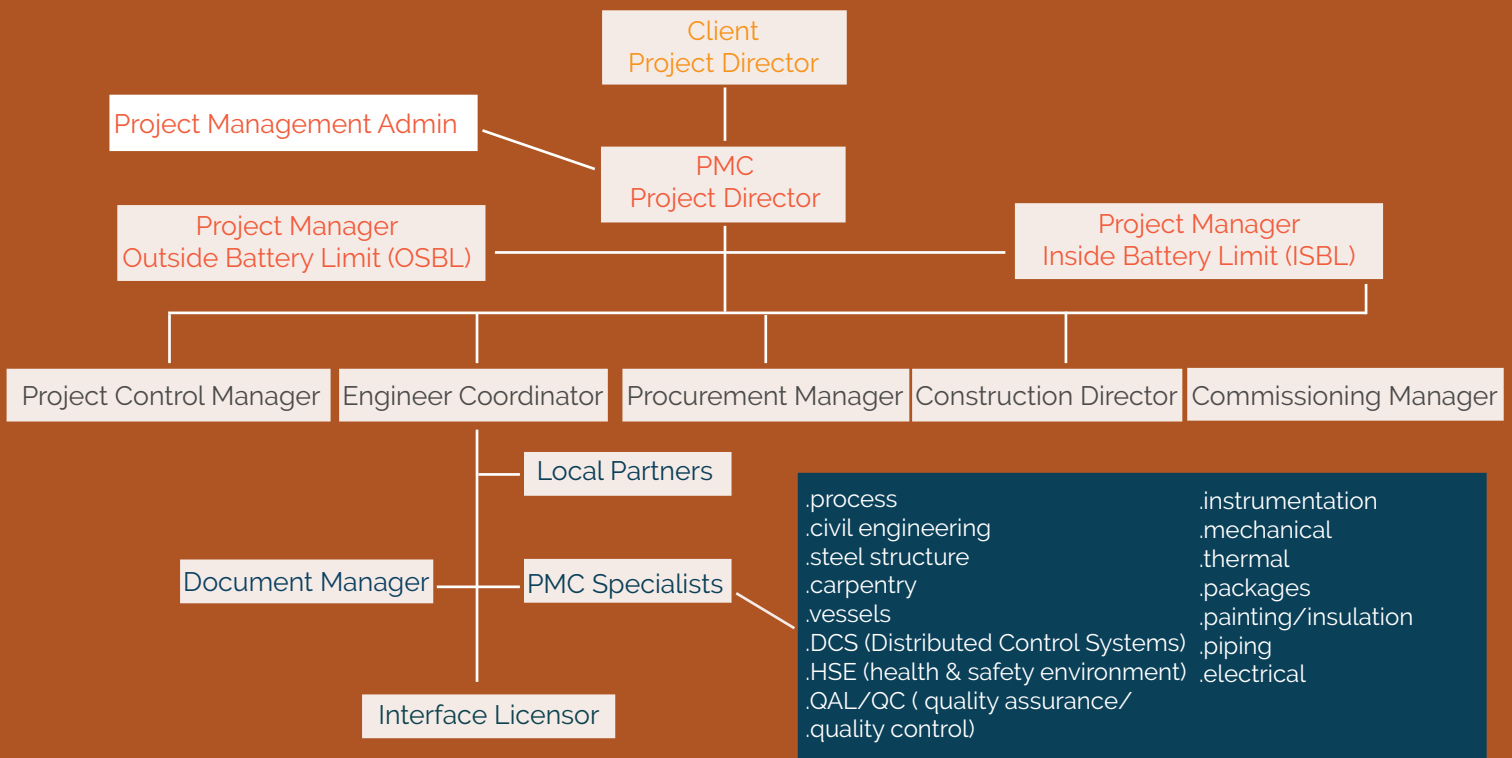

The skills brought by our construction engineer experts

From planning, engineering design, procurement to construction, our experts address mechanical (general, rotating, structural) or electrical and instrumentation completion, and ensure technical support during the various phases of your project.

VecTrance has a strong international network of experts who are result-oriented, problem-solver, culturally sensitive, and demonstrate the flexibility and autonomy required for the erection, installation and future smooth operation of your project. You can trust them to bring you strong leadership, analytical and negotiation skills, as well as a real sense of responsibility and cost awareness.

For each project we define the best organization in accordance with the project size and the project strategy.
